## ***PR.A.IT. Soc. Coop.***

The Company PR.A.IT. born in Perugia in 1990, it consists of a team of experts from various technical fields. The goal is to provide a complete response to all requirements relating to the design of the work and the various technical and legal aspects relating to him. Our professionals design identifying the best solutions for achieving the goals and take over and control than planned ensuring the perfect realization of the work and minimizing unplanned construction in accordance with the timelines provided by the schedule of works. Our company deals with safety at work, not only on construction but also in industries of all sectors, offices and public events. Our security management goes from writing of risks and instrumental measurement of the principal physical agents (noise, vibration, electromagnetic, microclimate and illuminance), the evaluation of explosive atmospheres and devising practical solutions to the problems related security. They are carried out training courses for workers, and we also work to prepare companies to *OHSAS 18001* by processing all the necessary documents and the implementation of technical changes - organizational, suitable for attaining certification in the shortest possible time . Our personnel is also highly qualified to prepare the model of organization, management and control pursuant to Legislative Decree no. 231/01, both as auditors. From the point of view of design (electrical, thermal, fire and photovoltaic systems) we operate throughout Italy and abroad, in Europe and outside the European Community; our professionals can interact with customers in different languages by going to the spot as many times as are considered necessary for the realization of the work and in the manner and on time.
